One Source Networks Selects NetSapiens' VoIP Service Delivery Platform For Enterprise Solutions

- NetSapiens announces launch of a new platform, SNAPsolutions by One Source Networks
- The partnership delivers a flexible, cloud based platform customizable solution to support business requirements of customers and end-users while providing voice services
- SNAPsolutions provides service delivery components critical to the OSN VoIP infrastructure, enabling OSN's end-user applications such as unified communications, virtual PBX, conferencing, and enhanced call center solutions

San Diego, CA September 13, 2011 – [NetSapiens, Inc.](#).. a provider of complete VoIP solutions for competitive communications providers announces today the successful launch of NetSapiens' [SNAPsolution](#) platform by [One Source Networks \(OSN\)](#), a facilities-based carrier agnostic communications solutions provider serving the Fortune 1000 enterprise market. NetSapiens is working in concert with OSN to deliver scalable, and reliable next-generation VoIP applications to OSN's enterprise customers who rely on OSN to deliver custom, cutting-edge network solutions.

The mutually rewarding partnership provides OSN with the ability to deliver a flexible, cloud-based platform customizable solution to support the unique business requirements of its customers and end users while providing enhanced enterprise voice service offerings. Furthermore, with OSN, NetSapiens benefits from the opportunity to expand its service across the enterprise space.

NetSapiens' SNAPsolution is utilized by [One Source Networks](#) to power a hybrid of cloud-based and premise-based solutions that can work in unison to meet the highest level of requirements put forth by enterprise customers. The SNAPsolution integrates all of the necessary service delivery components critical to the OSN VOIP infrastructure, such as accounting, provisioning, and call switching to enable OSN's end-user applications such as unified communications, virtual PBX, conferencing, and enhanced call center solutions.

"We are very excited about our engagement with OSN because it further validates the continued penetration and applicability of our solutions into a wide-range of markets, such as the Fortune 1000 enterprise space," states Anand Buch, Co-Founder and CEO of NetSapiens. "One of NetSapiens' key differentiators in the marketplace is that our architecture and business model allows us to work on an individualized basis with customers to design the most efficient and seamless network based on the service provider's and end-users' business needs."

"OSN selected NetSapiens' platform based on its ability to allow us to create additional valuable solutions for our customers, as well as its next-generation technology, flexibility, reliability, and cost structure," states Gina Nomellini, Chief Marketing Officer of One Source Networks. "Since partnering with NetSapiens, we are now able to offer our customers a seamless package with next generation networking, international capabilities and full mobility. OSN customers will benefit greatly from our ability to customize their VoIP networks based on their individual business structure. This collaboration will help us advance to a new level in cloud technology."

##

About NetSapiens

[NetSapiens](#) simplifies the delivery of IP voice and multimedia business communication services by providing turnkey solutions. NetSapiens' SNAPsolution™ integrates applications software, hardware, and services that enable competitive providers to quickly deploy services for increased revenue. These applications range from pre-paid calling, hosted PBX, to unified messaging, conferencing, and call center solutions. NetSapiens developed the IP multimedia platform (applications software) and integrates the technology and services needed, thereby eliminating interoperability issues that are often present in multi-vendor VoIP networks.
